Math 227C Spring 2020
Mathematical Biology: Stochastic modeling and statistical modeling

Syllabus
Location: Rowland 340N
Time: MWF 11am-11:50am
Instructor: Jun Allard jun.allard@uci.edu
Office hours: Fridays 3:30pm-5pm

Course website: https://canvas.eee.uci.edu/

Textbook: No required textbook. We will draw from:
- Modern Statistics for Modern Biology by Holmes and Hubert, available openly online, and
- Introduction to Statistical Learning using R by James, Witten, Hastie and Tibshirani, available openly online.
  In the second part of the course, we will make use of Jupyter notebooks and the R programming language.

Course rationale
This course follows MATH 227A and 227B in establishing mathematical and computational tools useful in modeling the dynamics of biological systems. This course, MATH 227C, is in two parts: the first covers stochastic processes, where randomness plays a role in the system behavior; the second covers statistical modeling, where models, including their attributes such as parameters, are learned from data in the presence of noise or inherent randomness in the model.

Course outline

Part I: Stochastic modeling
1. Probability and random variables
2. Discrete-time Markov chains
3. Poisson processes and continuous-time Markov chains
4. Ordinary differential equations with parametric noise
5. Stochastic ordinary differential equations

Part II: Statistical modeling
6. The likelihood function and maximum likelihood estimation
7. Linear and generalized linear models, including for counts data
8. Bootstrap for parameter inference
9. The variance-bias tradeoff and cross-validation
10. High-dimensional data: Lasso regression and related methods
11. Bayesian inference: Markov chain Monte Carlo

All homeworks must be typeset and handed in online through the Canvas system.

**Academic integrity**: Students are responsible for informing themselves of UCI’s policies regarding academic dishonesty. Students found in violation of the code are subject to penalties ranging from loss of credit for work involved to a grade of F in the course, and possible risk of suspension or probation. The academic dishonesty policy will be enforced in all areas of the course, including homework, quizzes, and exams. For more information about the academic dishonesty policy and procedures, including information about your rights and responsibilities as a student, see: http://www.editor.uci.edu/catalogue/appx/appx.2.htm

**Adding and Dropping the Course**: During the first two weeks of class, all add/drop changes are made online. There is also an online waitlist for the course if it is full. For more information please see the official guidelines at: http://www.math.uci.edu/courses/policy.php

**Special Needs Students**: Contact me privately or the UCI Disability Services Center.

**Student Wellness**: Your professors want you to thrive at UCI, and we believe that your physical and emotional well-being are the pathways to getting there. We encourage you to do your best to maintain a healthy lifestyle this quarter by eating well, exercising, getting educated about the effects of illicit drugs and alcohol, getting enough sleep, and taking some time to relax. This will help you achieve your goals and cope with stress. All of us benefit from support during times of struggle. You are not alone. There are many helpful resources available on campus and an important part of the college experience is learning how to ask for help. If you are interested in what you can do to promote wellness in yourself and others, visit the Center for Student Wellness & Health Promotion (studentwellness.uci.edu; 949-824-9355). This office, along with many other offices at UCI, can point you to campus resources that promote physical activity, good nutrition, and stress management. For other issues, consider reaching out to the Counseling Center (counseling.uci.edu; 949-824-6457). There are professionals there who can help with feelings of anxiety and depression, and who can provide guidance and support on a variety of concerns. Last, if you are concerned about a life threatening situation, we encourage you to contact the UCI Police Department at 9-1-1.
